Time					
06:00	09:00	12:00	15:00	18:00	21:00
Fog	Drizzle	Light rain	Heavy rain showers	Light rain showers	Cloudy
Precipitation probability					
10%	30%	40%	60%	40%	20%

Forecast for Sunday 23 Apr 2023

Weather: A cloudy start with outbreaks of light rain likely at times. Through the late morning and into the afternoon cloud beginning to lift and break to give some brightness but scattered showers developing, some of which could be locally heavy. Drier into the evening but cloud thickening once again overnight.

Chance of cloud-free hill tops above 600m: 40% chance at first, improving to a 90% chance in the afternoon

Low Cloud and visibility: Widespread cloud at first, with bases down to 300-400m. Cloud increasingly lifting and breaking into the afternoon with eventually scattered bases above around 700-800m. Locally poor visibility at first, improving to become good or very good, with distant hills generally visible outside of any summit cloud, though temporarily reducing to moderate or poor in any showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Conditions will change quickly at the tops through the day with care needed. Adequate layers and waterproofs advised despite any afternoon brightness, with the potential for increasing wind chill by evening and the risk of showers.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Sun 23 Apr 2023	12.2mm	20.6mm	20.6mm

Forecast for Monday 24 Apr 2023

Weather: Generally dry with some brightness during the morning but turning showery into the afternoon, wintry over the tops. Feeling cooler with a fresh northerly breeze.

Maximum wind: Northerly 15-20mph gusting 25-30mph.

Chance of cloud-free hill tops above 600m: 80%.

Low Cloud and visibility: Patchy cloud at first, with bases possibly locally down to 400m. As with Sunday cloud increasingly lifting and breaking into the afternoon above around 800m. Some poor visibility at first, improving to become good or very good, with distant hills generally visible outside of any summit cloud, though temporarily reducing to moderate or poor in any showers.

Temperature: **Valleys:** Plus 1 Celsius, becoming plus 5 Celsius.
At 600m: Minus 1 Celsius, becoming 2 Celsius.
Freezing level: 600m.
